

Figure 1 is a line plot showing the performance of NPESS Wave_LA8 levels (0 to 11) compared to the original data. The x-axis represents the number of datapoints (0 to 14,000), and the y-axis represents the performance metric (0.0 to 1.0). The plot shows that as the number of datapoints increases, the performance of all levels converges towards the original data. Level 0 (red) shows the highest performance, while level 11 (red) shows the lowest performance. The legend indicates that the original data is represented by a black dashed line.
